

# A beacon for South Beach.

## We are putting a Windmill Sculpture on our Waterloo Headland

We're the The South Beach Beacons CIC and we're working with some artists to put a new sculpture on the Prom at the end of Waterloo Road. Paid for by the four organisations as listed above, and chosen by local residents the sculpture is by us and for us, local people.

We are delighted that your family is joining us to create your own windmill.  
Here's how to create your windmill, using the things in your kit and a pair of scissors.

### How to

1. Fold one of your card squares in half, touching one corner to the one diagonally opposite, creating a triangle shape.
2. Open it back up and fold it again into half with the other two diagonally opposite corners touching, and open this back up.
3. Now you can decorate your windmill. You can draw on it, you can colour it, you can stick pretty things on it, like the stickers we have sent to you.
4. Now take your scissors and cut along the fold from each corner 2/3 of the way to the centre of the square. Do this with all 4 corner's folds.
5. Take one of the little circular glue spots in the white layers of plastic, peel one side of plastic off, press the sticky circle onto the centre of the square where the folds cross. Then peel the second layer of plastic off to make it ready to stick something onto the centre of the square.
6. Take one 'pointed flap' from one of the corners and curling the card, press this point onto the circular sticky fixer, so that half of that corner is curled over and attached to the centre of the square.
7. Move to the next corner and take the same 'pointed flap' from that corner using another sticky fixer to curl that over to stick it on top of the other point in the centre of the windmill.
8. Repeat step 6 again twice. You should now be able to see clearly your children's windmill 3D shape.
9. Now using the one point of the scissors make a hole right through this centre, so that you can poke a cocktail stick through the centre.
10. Leaving a little space between windmill and straw, add a 'cone' of plasticine to the front of the cocktail stick to keep it in place.
11. Turn your windmill over and poke the cocktail stick through one end of an art straw. Place another cone of plasticine over the back of the cocktail stick.

Now you have your finished windmill.

Well done! How will you decorate your next one?

We'd love a photo of your windmills to put on our Facebook page. Please ask your grown-up to send us one.

Keep an eye on our Facebook page: ['Meet Me At The Windmill'](#) for details of the launch.

We hope to see you at the launch of our windmill sculpture.
